Such a system would: a) be environmentally and socially responsible; b) align with planetary boundaries; c) manage natural resources sustainably; d) avoid doing more harm than good; and e) be resilient and adaptable to changing conditions. The overarching theme in this collection of chapters is a response to the worldwide, supranational sustainable finance discussions about how we can transition to a new socio-ecological system where finance, human well-being, and planetary health are recognized as being highly intertwined. Chapter 1 provides detailed information about the company, services, target population, market research, customer analysis, competitor analysis, and marketing strategy. Chapter 2 deals with the feasibility analysis and provides information on company’s SWOT analysis.
