[Insurgent Universality](#) Dec 20 2019

Scholars commonly take

the Declaration of the Rights of Man and Citizen of 1789, written during the French Revolution, as the starting point for the modern conception of human rights.

According to the Declaration, the rights of man are held to be universal, at all times and all places. But as recent crises around migrants and refugees have made obvious, this idea, sacred as it might be among human rights advocates, is exhausted. It's long past time to reconsider the principles on which Western economic and political norms rest. This book advocates for a tradition of political universality as an alternative to the juridical universalism of the

Declaration. Insurgent universality isn't based on the idea that we all share some common humanity but, rather, on the democratic excess by which people disrupt and reject an existing political and economic order. Going beyond the constitutional armor of the representative state, it brings into play a plurality of powers to which citizens have access, not through the funnel of national citizenship but in daily political practice. We can look to recent history to see various experiments in cooperative and insurgent democracy: the Indignados in Spain, the Arab Spring, Occupy, the Zapatistas in Mexico, and, going further back, the Paris Commune, the

1917 peasant revolts during the Russian Revolution, and the Haitian Revolution. This book argues that these movements belong to the common legacy of insurgent universality, which is characterized by alternative trajectories of modernity that have been repressed, hindered, and forgotten. Massimiliano Tomba examines these events to show what they could have been and what they can still be. As such he explores how their common legacy can be reactivated. Insurgent Universality analyzes the manifestos and declarations that came out of these experiments considering them as collective works of an alternative canon of political

theory that challenges the great names of the Western pantheon of political thought and builds bridges between European and non-European political and social experiments.

[SkyPortal User's Guide](#) Jan 25

2023 This book serves as a comprehensive guide for using a Nexstar Evolution mount with WiFi SkyPortal control, walking the reader through the process for aligning and operating the system from a tablet or smartphone. The next generation Go-To mount from Celestron, this is compatible not only with the Nextstar

Evolution but also with older mounts. It is the ideal resource for anyone who owns, or is thinking of owning, a Nexstar Evolution telescope, or adapting their existing Celestron mount. Pros and cons of the system are thoroughly covered with a critical depth that addresses any possible question by users. Beginning with a brief history of Go-To telescopes and the genesis of this still new technology, the author covers every aspect of the newly expanding capability in observing. This includes the associated Sky Portal smartphone and tablet application, the transition from the original Nexstar GoTo system to the new SkyPortal

system, the use of the Sky Portal application with its Sky Safari 4 basic software and Celestron WiFi adaptations, and discussions on the use of SkyPortal application using the Celestron adapter on older Celestron mounts. Comments and recommendations for equipment enable the reader to successfully use and appreciate the new WiFi capability without becoming overwhelmed. Extensively illustrated using actual screenshots from the program interface, this is the only guide to the Nextstar SkyPortal an observer will need.

**Model Law on Access to Information for Africa and other regional instruments: Soft law and human rights in Africa** Apr 04 2021 Model Law on Access to Information for Africa and other regional instruments: Soft law and human rights in Africa Edited by Ololade Shyllon 2018 ISBN: 978-1-920538-87-3 Pages: 255 Print version: Available

Electronic version: Free PDF available About the publication The adoption in 2013 of the Model Law on Access to Information for Africa by the African Commission on Human and Peoples' Rights is an important landmark in the increasing elaboration of human rights-related soft law standards in Africa. Although non-binding, the Model Law significantly influenced the access to information landscape on the continent. Since the adoption of the Model Law, the Commission adopted several General Comments. The AU similarly adopted Model Laws such as the African Union Model Law on Internally Displaced Persons

in Addressing Internal Displacement in Africa. This collection of essays inquires into the role and impact of soft law standards within the African human rights system and the AU generally. It assesses the extent to which these standards induced compliance, and identifies factors that contribute to generating such compliance. This book is a collection of papers presented at a conference organised by the Centre for Human Rights, University of Pretoria, with the financial support of the government of Norway, through the Royal Norwegian Embassy in Pretoria. Following the conference, the papers

were reviewed and reworked.
