Bank Resolution Costs, Depositor Preference, and Asset Encumbrance Oct 31 2020 Depositor preference and collateralization of borrowing may reduce the cost of settling the conflicts among creditors that arises in case of resolution or bankruptcy. This net benefit, which may be capitalized into the value of the bank rather than affect creditors' expected returns, should result in lower overall funding costs and thus a lower probability of distress despite increasing encumbrance of the bank's balance sheet. The benefit is maximized when resolution is initiated early enough for preferred depositors to remain fully protected.

Bank Recovery and Resolution Feb 27 2023 Bank Recovery and Resolution Second Edition Sven Schelo Since 2008, enormous efforts have been made worldwide to draft rules to prevent a reoccurrence of the devastating financial events of that year. In the process, bank business has been

laid open to intense public and government scrutiny, and regulation of banking has grown to spectacular proportions. Prominent among the measures taken is the EU Bank Recovery and Resolution Directive (BRRD), which, together with the Single Resolution Mechanism (SRM) and the Single Resolution Fund, constitutes a crucial new pillar in the European Banking Union. Practitioners searching for orientation in what can readily be perceived as a ‘jungle’ have an urgent need for a clear and systematic description and analysis of these new rules, which are sure to have a massive impact on bank business from this time on, not only in Europe but also wherever European business is to be found. The solidly grounded analysis in this important book sets the new rules under BRRD into their full context as cross-border phenomena. With its crystal-clear explanation of key provisions, procedures, and ‘triggers’, the book organises a highly complex legal system into patterns and action plans that can be applied in virtually any eventuality likely to arise in cases where bank business is of central significance. Among the topics covered are the following: – entities covered by BRRD; – exceptions under BRRD; – objective and scope of BRRD tools – bail-in, bridge bank, sale of business, asset separation; – asset quality reviews; – curing or mitigating the continuing problem of non-performing loans; – new rules as response to lack of private solutions; – banks’ requirement to provide a minimum amount of eligible liabilities; – safety buffers to protect resolution; – need to be ‘resolvable’ in a worst case; – leverage and liquidity ratios; – forced mergers; – market spillover effects of recovery planning; – group recovery planning; – effects of foreign law contracts and assets; – write-down of capital instruments; and – special problems of cross-border restructuring. The presentation is enhanced by a comparative dimension, which includes reference to United States and other national developments and a full-scale analysis of Switzerland’s regulatory response to the crisis. Given that a full seamless global system of bank recovery and resolution has not yet been found, and that major banks are global players headquartered in different jurisdictions and even different continents, this book will greatly assist in the work of practitioners who must deal with cases involving international banking under the prevailing status quo. Its usefulness to officials and academics in international banking and finance law and policy, who are working towards a global solution, is of incalculable value.

People’s Republic of China–Hong Kong Special Administrative Region: Financial Sector Assessment Program-Crisis Management and Bank Resolution Framework-Technical Note Jan 02 2021 In recent years, the IMF has released a growing number of reports and other documents covering economic and financial developments and trends in member countries. Each report, prepared by a staff team after discussions with government officials, is published at the option of the member country.

Bank Resolution and Public Backstop in an Asymmetric Banking Union Mar 24 2020

Brazil Dec 01 2020 Important improvements have been made to the bank resolution, safety net and crisis management framework since the last FSAP. The resolution framework has been strengthened with the creation, within the Banco Central do Brasil (BCB), of a new Resolution Department, and requirements for recovery and resolution planning have been established. The early intervention powers of the BCB are robust and flexible. Notwithstanding this progress, the current framework has limitations that are broadly acknowledged by the authorities. Resolution powers are incomplete and no formal inter-agency arrangements for crisis management are in place. The BCB has taken the lead in preparing a comprehensive draft law (the “Draft Law”) that seeks to introduce a new resolution regime in line with international best practices. This FSAP takes place therefore at a critical juncture. It provides recommendations on the design features of the new resolution regime, examining the existing framework as well as the areas not addressed in the Draft Law.

Practical Guidelines for Effective Bank Resolution May 18 2022

Ireland Jun 19 2022 This Technical Note discusses the findings and recommendations in the Financial Sector Assessment Program for Ireland regarding the financial safety net, bank resolution, and crisis management. The introduction of the “single rulebook” for financial services regulation within the European Union and the establishment of the banking union have transformed the Irish framework for dealing with failing banks. The new regime reflects an EU-wide initiative to strengthen supervision, harmonize prudential rules, and establish a uniform bank resolution regime. The Bank Recovery and Resolution Directive has significantly strengthened the resolution regime in Ireland and the European Union. Significant progress has also been made on the banking union, although key aspects remain to be completed.

Czech Republic Mar 16 2022 The Czech financial system is confronted with mounting risks that stem mainly from negative developments in the European Union (EU). This technical note focuses on crisis management and bank resolution framework for the Czech Republic. It summarizes the high-level observations of the mission based on its key findings and recommendations, and analyzes the existing institutional framework and coordination arrangements for crisis management. The note also examines the cross-border dimension of crisis preparedness and crisis management tools.

The Single Resolution Mechanism Mar 04 2021 This book takes stock after a year of application of the SRM and examines the situation from various perspectives: the perspective of the SRB, the NRA, the supervised bank and judicial protection. Special attention is given to the division of power between the RB and the NRA and the impact on the supervised bank, the relationship and links between the SRM and the SSM and the query whether the right balance between national and supranational powers has been struck, also in view of the principle of subsidiarity.

The New Bail-In Legislation Jul 08 2021 Financial stability is a pillar of well-functioning financial markets. After the last financial crisis, European policymakers harmonised banking regulation and revised the framework of banking resolution. The introduction of the bail-in legislation is a natural experiment to improve the understanding of banking resolution and how it affected the funding strategies of banks. This book assesses whether financial stability has been strengthened by the change in banks’ resolution policy with a focus on the bail-in. The book shows how banks changed their funding strategies, shrank their balance-sheets and relied more on deposits. The book will discuss inter-alia the mis-selling of bonds, which happened during 2012-2013, analysing whether the bond allocation changed after the bail-in launch. It discusses how the bail-in mechanism was deemed credible by equity holders and argues that the European case would have useful implications for third countries. Finally, the book relates this discussion to the possible collateral effects generated by the new resolution policy during and after the COVID-19 crisis, which will be of particular interest to researchers and policymakers in banking and financial institutions. ?

Building Strong Banks Through Surveillance and Resolution Sep 22 2022 Annotation This publication contains guidance on setting up strong regulatory and supervisory systems to help prevent financial problems in the banking sector, as well as to deal with problems should a crisis erupt. It presents a collection of essays drawn from practical experience which discuss a wide range of issues including developing adequate standards for loan classification, provisioning liquid money markets, and the resolution and recapitalisation of failed banks.

Resolution Authorizing Certain Investigations by the Committee on Banking and Currency Jul 28 2020

Accelerated Resolution Program Feb 21 2020 Distributed to some depository libraries in microfiche.

Recognition of Foreign Bank Resolution Actions Jan 26 2023 This timely book offers a comprehensive study of the mechanism that gives effect to foreign bank resolution actions. In particular, it focuses on how the legal framework for the recognition of foreign bank resolution actions should be structured and proposes detailed legal principles on which effective frameworks should be based.

Resolutions of Mr. Watkins, on the Subject of the Bank of the United States, &c Jan 22 2020 Resolution proposed by Mr. Watkins, and substitute of Mr Shell, regarding the Bank of the United States. The initial resolution sought to rescind the prior session's request to return public money to this bank; instead, the United States senators should refuse to renew the bank and continue to keep public money in state banks. The substitution would simply allow the senators to do what was best in the circumstances.

Management and Resolution of Banking Crises Jul 20 2022 WBI Learning Resources Series. Water is a vital element for agricultural production and for economic development in general. However, the spatial and temporal distribution of water in Mexico restrains its use. Because of this distribution, it has been necessary to build a large infrastructure to capture, store, and allot this element among water users. Around the world, countries that once promoted more government involvement in irrigation management are adopting new policies that do just the opposite, creating incentives for farmers to take over the management of operations and maintenance, while government agencies focus on improving the management of water at the main system level. Is this just another management fad; or will the pendulum that is now swinging toward greater management control by farmers soon swing back the other way, toward greater state control? This volume reports on four countries where the state's role in irrigation management has undergone fundamental change and where the result has been a much greater management role for farmers. These studies address the political antecedents of participatory irrigation management (PIM) policies, the process of implementing the policies, and the second-generation challenges of sustaining PIM. These experiences will prove useful to policymakers and irrigation professionals who are facing similar challenges in their own countries.

Safe to Fail Oct 23 2022 Banks are entering a new environment. Regulation and supervision are becoming tougher, so that banks will be less likely to fail. If a bank does fail, bail-in rather than bail-out will be the new resolution regime, so that investors, not taxpayers, bear loss. Safe to Fail sums up the challenges that banks will face and how they can meet them.

Morocco Jan 14 2022 This paper discusses key issues related to the economy of Poland. Thanks to its sound policies, close links to the German supply chain, and substantial EU transfers, Poland is the only country in the European Union that avoided an outright recession during the global financial crisis. However, this strong performance has masked enduring regional disparities, which are undermining the quality of growth. Poland faces significant long-term challenges as an aging population weighs on potential growth and public finances. The new government, which took office in November, has approved a Responsible Development Plan, focused on spurring growth through innovation and reducing social and regional disparities.

Management and Resolution of Banking Crises Dec 13 2021 WBI Learning Resources Series. Water is a vital element for agricultural production and for economic development in general. However, the spatial and temporal distribution of water in Mexico restrains its use. Because of this distribution, it has been necessary to build a large infrastructure to capture, store, and allot this element among water users. Around the world, countries that once promoted more government involvement in irrigation management are adopting new policies that do just the opposite, creating incentives for farmers to take over the management of operations and maintenance, while government agencies focus on improving the

management of water at the main system level. Is this just another management fad; or will the pendulum that is now swinging toward greater management control by farmers soon swing back the other way, toward greater state control? This volume reports on four countries where the state's role in irrigation management has undergone fundamental change and where the result has been a much greater management role for farmers. Resolution Trust Corporation's Asset Disposition Policies Nov 19 2019

Resolutions on Free Banking Nov 24 2022 Resolution to have the Committee on Banks prepare a bill to authorize the formation of banking associations with the usual banking powers, within limitations included in the resolution.

Spain Apr 17 2022 The transposition of the Bank Recovery and Resolution Directive (BRRD) into Spanish law strengthened the resolution regime in Spain.¹ Resolution powers in the past depended on the combination of public support, an asset separation tool (Asset Management Company, Sareb) and mergers and acquisitions. Those tools exposed the Spanish authorities to high public costs and were ineffective in the face of resolving large, complex institutions.² The BRRD established harmonized rules within the European Union (EU) for recovery and resolution of banks and investment firms; within the euro area, the Single Resolution Mechanism Regulation (SRMR) aims to establish uniform resolution rules and procedures—the BRRD and the SRMR are closely aligned with the Financial Stability Board (FSB)'s Key Attributes of Effective Resolution Regimes for Financial Institutions (KAs). The implementing national legislation contains a broad set of resolution tools and establishes a framework for improved recovery and resolution planning as well as coordination across the EU.

Euro Area Policies Sep 10 2021 The euro area (EA) bank resolution and crisis management arrangements have been strengthened considerably over recent years, but work remains to complete and unify the regime. The adoption of the Bank Recovery and Resolution Directive (BRRD) and the Single Resolution Mechanism Regulation (SRMR), and the establishment of the Single Supervisory Mechanism (SSM) and the Single Resolution Mechanism (SRM) provide a foundation to deal with problem banks. The authorities remain committed to completing the banking union through the establishment of a backstop for the Single Resolution Fund (SRF) and a European deposit insurance scheme (EDIS) and other

measures, many of which are in line with recommendations in this report.

International Conference on Deposit Insurance and Problem-bank Resolution Policies Nov 12 2021

Resolution in Europe: The Unresolved Questions Jun 07 2021 The work draws conclusions of the fourth conference in a series on the subject of "too big to fail", hosted by the Institute for Law and Finance at Goethe University, Frankfurt am Main on April 23, 2018. It presents the views of key European Union officials as well as senior executives from the financial sector on where Europe stands in this crucial area.

Ocean National Bank. Resolution Relative to the Ocean National Bank of New York City. December 18, 1873. -- Referred to the Committee on Banking and Currency and Ordered to be Printed Aug 21 2022

Research Handbook on Cross-Border Bank Resolution Feb 15 2022 Since 2008, many countries across the globe have witnessed the introduction of new recovery and resolution regimes for banks. Whereas much may have been achieved on regional levels, this has not been perfect, and many global challenges remain unsolved. The Research Handbook on Cross-Border Bank Resolution analyses the strengths and weaknesses of the current regulatory framework for cross-border bank crises with contributions from eminent experts from the US, EU, Japan and China. The topic is addressed from both economic, and legal perspectives, with a special section devoted to real-life cases.

The European Banking Union Feb 03 2021 The 2008 financial crisis all but brought down the financial system and real economies of industrial countries. The Banking Union took a broad approach to resolve the structural fragmentation and distortions in the European banking system which were major obstacles to a working single market for financial services. This book examines the numerous changes happening to European legislations for the prevention and management of banking crises. What emerges is a changing picture of regulations and institutions, of goals, tools and opinions, public and private, European and national all involved in the task. The book focuses on the new framework for banking crisis management, starting from the foundations of banking regulation and supervision. It explores the institutional architecture of banking supervision and crisis management, the powers of the authorities, the tools for administrative actions, the complexities of business and bankruptcy laws, individual rights and their legal guarantees.

Challenges for Resolution of Banks in Sub-Saharan Africa Sep 29 2020 While the recent global financial crisis has affected many developed countries, it has had less impact in Africa. Nevertheless, the lessons learned from this crisis are relevant for African countries, especially because banking groups with a head office in Africa have grown rapidly and these groups are systemically present in many of their African host countries. As macroeconomic conditions have deteriorated in many Sub-Saharan African countries in the last two years, the question arises whether the regulatory framework for the financial systems of these countries is strong enough to face a serious financial crisis in the future. This paper highlights the twelve essential characteristics of effective resolution regimes for financial institutions, as provided by the Key Attributes. These features should be integrated in the national resolution frameworks for financial institutions and tailored to the local circumstances and legal traditions. For each feature, the paper maps the challenges for introducing them in resolution regimes for banks in the Sub-Saharan African region.

Resolution Trust Corporation's Minority and Women-owned Business Programs Aug 09 2021

Oversight of the Resolution Trust Corporation May 06 2021

Financial Crisis Management and Bank Resolution Dec 25 2022 Financial Crisis Management and Bank Resolution provides an analysis of

the responses to the recent crisis that has beset the international financial markets taking a top down approach looking at the mechanisms to manage a financial crisis, to the practicalities of dealing with the resolution of a bank experiencing distress. This work is an interdisciplinary analysis of the law and policy surrounding crisis management and bank resolution. It comprises contributions from a team of leading experts in the field that have been carefully selected from across the globe. These experts are drawn from the law, central banks, government, financial services and academia. This edited collection will provide a new and important contribution to the subject at a crucial time in the debate around banking resolution and crisis management regimes, and help to plug the gap in our knowledge and understanding of the law of bank resolution and restructuring.

Operation of the National and Federal Reserve Banking Systems Jun 26 2020

Resolution and Insolvency of Banks and Financial Institutions Dec 21 2019 Discussing the legal mechanisms available in the EU and the United States to deal with banks and other financial institutions that are in financial distress, this book analyses the impact of the Bank Recovery and Resolution Directive looking at implementation in the UK and Germany, and uses US law as a comparative reference point.

Resolution of Cross-Border Banking Groups Apr 24 2020 This chapter examines the prospects for effective cross-border resolution of failing systemically important banks. It begins by recalling the prevalence of national interests when cross-border banks were resolved in the financial crisis. It notes that in some cases foreign creditors benefitted from nationally-driven action, even if sometimes they did not. However, it concludes that the positive externalities from nationally motivated action are likely to be lower in the future because of the likely lower incidence of bail-outs. It then turns to the prospects of cross-border cooperation both in the case of single point of entry (SPE) and multiple point of entry (MPE) resolutions. It argues that cross-border cooperation will be important to maximise value to creditors in both cases, obviously in the case of MPE but also to an extent that is sometimes not recognised in the case of SPE. Finally, it turns to an assessment of how likely it is that cross-border cooperation will emerge (a) under the FSB Key Attributes and (b) within the European Union, dealing with both the Banking Union and the EU as a whole.

Slovenia: Technical Assistance Report-Bank Intervention and Resolution and the Deposit Guarantee System Aug 29 2020 This Technical Assistance Report assesses the bank resolution framework and deposit guarantee system in Slovenia. There are three necessary requirements for effective bank resolution: (1) a special bank resolution regime, (2) advance preparation for bank intervention and resolution, and (3) an adequately funded Deposit Guarantee Scheme (DGS). Slovenia's banking law provides for the first, while the recommendation to create a Resolution Unit within Bank of Slovenia has been adopted. The extant DGS, however, is an ex post funded scheme that does not fulfill the third criteria. Slovenia must implement the European Union Deposit Guarantee Scheme Directive into national law, which calls for an ex ante funded DGS.
