*From Menstruation to the Menopause* Oct 11 2021 This book examines the representation of the female fertility cycle in contemporary Algerian, Mauritian, and French women's writing. It focuses on menstruation, childbirth, and the menopause whilst also incorporating experiences such as miscarriage and abortion. This study frames its analysis of contemporary women's writing by looking back to the pioneering work of the second-wave feminists. Second-wave feminist texts were the first to break the silence on key aspects of female experience which had thus far been largely overlooked or considered taboo. Second-wave feminist works have been criticised for applying their 'universal' theories to all women, regardless of their ethnicity, socio-economic status, or sexuality. This book argues that contemporary women's writing has continued the challenge against normative perceptions of the body that was originally launched by the second-wave feminists, whilst also taking a more nuanced, contextual and intersectional approach to corporeal experience. The cross-cultural and interdisciplinary approach of this book is informed not only by critics of the second-wave feminist movement but also by sociological studies which consider how women's bodily experiences are shaped by socio-cultural context.

*Language, Culture, and Society* Jun 07 2021 Why should we study language? How do the ways in which we communicate define our identities? And how is this

all changing in the digital world? Since 1993, many have turned to *Language, Culture, and Society* for answers to questions like those above because of its comprehensive coverage of all critical aspects of linguistic anthropology. This seventh edition carries on the legacy while addressing some of the newer pressing and exciting challenges of the 21st century, such as issues of language and power, language ideology, and linguistic diasporas. Chapters on gender, race, and class also examine how language helps create-and is created by-identity. New to this edition are enhanced and updated pedagogical features, such as learning objectives, updated resources for continued learning, and the inclusion of a glossary. There is also an expanded discussion of communication online and of social media outlets and how that universe is changing how we interact. The discussion on race and ethnicity has also been expanded to include Latin- and Asian-American English vernacular.

**Negotiating Patriarchy and Gender in Africa** Jun 26 2020 This book examines the entrenchment of patriarchy in Africa and its attendant socioeconomic and political consequences on gender relations. Using both historical and modern examples, contributors analyze the ways women have been systematically marginalized in African societies and call for improved policy implementation on gender issues in Africa.

**Gender and the Representation of Evil** Sep 22 2022 This edited collection examines gendered representations of "evil" in history, the arts, and literature. Scholars often explore the relationships between gender, sex, and violence through theories of inequality, violence against women, and female victimization, but what happens when women are the perpetrators of violent or harmful behavior? How do we define "evil"? What makes evil men seem different from evil women? When women commit acts of violence or harmful behavior, how are they represented differently from men? How do perceptions of class, race, and age influence these representations? How have these representations changed over time, and why? What purposes have gendered representations of evil served in culture and history? What is the relationship between gender, punishment of evil behavior, and equality?

Female Genital Cutting in Industrialized Countries: Mutilation or Cultural Tradition? **Masculinity and Syrian Fiction** Dec 21 2019 What can novels tell us about masculinity in Syria? In this book, Lovisa Berg explores over 20 Syrian novels covering the last 50 years of the 20th century. Uniquely, she examines only female writers in order to gauge the changing ways in which Syrian women perceived the function of masculinity, and the impact certain attitudes towards masculinity have on men, women, children and Syrian society, from a female perspective. The works of writers from Kulit Khuri to Usayma Darwish are analysed to explore changing attitudes to gender in Syria and the Middle East, as well as the political upheavals within the country and region. We see the idealistically portrayed men in the novels of female authors in the 1950s give way in time to a more critical depictions of patriarchy. Above all, we see through the use of novels a plethora of critiques of masculine hegemony in Syrian society, the authors of which are able with the use of fiction to reorganise and question maleness in a way denied to them in reality. This book will be of interest to scholars of Contemporary Syrian and Arabic Literature, Masculinity Studies and Women's Studies.

**The Oxford Handbook of Language and Race** Sep 29 2020 "This handbook is the first volume to offer a sustained theoretical exploration of all aspects of language and race from a linguistic anthropological perspective. A growing number of scholars hold that rather than fixed and pre-determined, race is created out of continuous and repeated discourses emerging from individuals and institutions within specific histories, political economic systems, and everyday interactions. This handbook demonstrates how linguistic analysis brings a crucial perspective to this project by revealing the ways in which language and race are mutually constituted as social realities. Not only do we position issues of race, racism, and racialization as central to language-based scholarship, but we also

examine these processes from an explicitly critical and anti-racist perspective. The process of racialization—an enduring yet evolving social process steeped in centuries of colonialism and capitalism—is central to linguistic anthropological approaches. This volume captures state-of-the-art research in this important and necessary yet often overlooked area of inquiry and points the way forward in establishing future directions of research in this rapidly expanding field, including the need for more studies of language and race in non-U.S. contexts. Covering a range of sites from Angola, Brazil, Canada, Cuba, Italy, Liberia, the Philippines, South Africa, the United Kingdom, the United States, and unceded Indigenous territories, the handbook offers theoretical, reflexive takes on the field of language and race, the larger histories and systems that influence these concepts, the bodies that enact and experience them, and finally, the expressions and outcomes that emerge as a result"--

**The Licit Life of Capitalism** Aug 09 2021 The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

Kinship and Gender Feb 03 2021 Designed for undergraduate courses in kinship, gender, or the two combined, Linda Stone's *Kinship and Gender* is the product of years of teaching. The topic of kinship comes alive when linked to gender issues; conversely, the cross-cultural study o...

**Global Inequality** Jul 08 2021 Inequality is currently gaining considerable attention in academic, policy, and media circles. From Thomas Piketty to Robert Putnam, there is no shortage of economic, sociological, or political analyses. But what does anthropology, with its focus on the qualitative character of relationships between people, have to offer? Drawing on current scholarship and illustrative ethnographic case studies, McGill argues that anthropology is particularly well suited to interrogating global inequality, not just within nations, but across nations as well. Brief, accessibly written, and peppered with vivid ethnographic examples that bring contemporary research to life, *Global Inequality* is an introduction to the topic from a unique and important perspective.

*Sex after Service* Oct 23 2022 Military service members and veterans are perhaps particularly vulnerable to sexual dysfunction given some common experiences in the military and during combat deployments. Deployment to a combat theater is an inherently stressful experience, made worse with actual combat exposure and other physical and psychological hardships and trauma. This in turn contributes to higher rates of physical damage (including traumatic brain injury and amputations), post-traumatic stress disorder, and unhealthy coping mechanisms (alcohol and substance abuse). Medications commonly prescribed to treat or manage these conditions can also contribute to sexual dysfunction. Perhaps worst of all, the most intense period of experiencing these complications is likely to occur in the service member's or veteran's 20s and early 30s, the life stage at which most Americans are dating, selecting a partner, and creating a family. Sexual dysfunction can have significant impacts on all of those important activities. This book serves as an authoritative resource for military service members, veterans, and those who love them, on all manner of sexual health issues. Starting with an introduction to the basic concepts of sexual health, Helmer then goes on to discuss the effects of combat on overall health, sexual health and function, and differences in those effects on men and women. Including Veterans' stories throughout, the book illustrates some of the challenges and complex situations empathically and in nonjudgmental terms. While many service members join and experience combat before the age of 30, the author also considers the effects of aging and life stage on sexual health and function in military personnel. Finally, Helmer clearly articulates a process for determining if there is a sexual health issue that rises to the level of a problem and what can be done about it. This is handled with a positive, hopeful tone and general, yet effective, suggestions on where and how to seek assistance.

**Transcultural Flows of English and Education in Asian Contexts** Dec 25 2022 This book investigates the “collision” or “synthesis” that occurs between

people when cultures are shared and reconstructed in different contexts and result in hybridity. By focusing on transcultural flows the authors acknowledge the hybridity in educational concepts and practices that emerge as a result of relationships and processes that occur inside and outside of the classroom as people and their cultures come together.

**Native Nations** Jan 02 2021 Combining historical background with discussion of contemporary Native nations and their living cultures, this comprehensive text introduces students to some of the many indigenous peoples in North America. The book is organized into parts corresponding to regional divisions within which similar, though not identical, cultural practices developed. Each part opens with an overview of the topography, climate, and natural resources in the area, and describes the range of cultural practices and beliefs grounded in the area. Subsequent chapters are devoted to specific tribal groups, their history, and the conditions of contemporary Native communities. Nancy Bonvillain provides context for the regional and tribe-specific chapters through a brief overview of Native American history beginning around 1500 and covering the early period of European exploration and colonization. She details both U.S. and Canadian policies affecting the lives, cultures, and survival of more than five hundred Native nations on this continent. Finally, she offers up-to-date demographics and addresses significant social, economic, and political issues concerning Native communities. The second edition features new material throughout, including a new two-chapter section on the Native nations of the Plateau, expanded introductory material addressing topics such as climate change and recent Supreme Court decisions, up-to-date demographic and economic data, and more.

**Language and Society** Oct 19 2019 Language and Society is a broad introduction to the interaction of language and society, intended for undergraduate students majoring in any academic discipline. The book discusses the complex socio-political roles played by large, dominant languages around the world and how the growth of major national and official languages is threatening the continued existence of smaller, minority languages. As individuals adopt new ways of speaking, many languages are disappearing, others are evolving into hybrid languages with distinctive new forms, and even long-established languages are experiencing significant change, with young speakers creating novel expressions and innovative pronunciations. Making use of a wide range of case studies selected from the Americas, Europe, Asia and Africa, Andrew Simpson describes and explains key factors causing language variation and change which relate to societal structures and the expression of group and personal identity. The volume also examines how speakers' knowledge of language acts as an important force controlling access to education, advances in employment and the development of social status. Additional topics discussed in the volume focus on the global growth of English, gendered patterns of language use, and the influence of language on perception.

**Language, Global Mobilities, Blue-Collar Workers and Blue-collar Workplaces** Aug 29 2020 This collection brings together global perspectives which critically examine the ways in which language as a resource is used and managed in myriad ways in various blue-collar workplace settings in today's globalized economy. In focusing on blue-collar work environments, the book sheds further light on the informal processes through which top down language policies take place in different multilingual settings and the resultant asymmetrical power relations which emerge among employees and employers in such settings. Taking into account the latest debates on poststructuralist theories of language, the volume also extends its conceptualization of language to demonstrate the ways in which it extends to a wider range of multilingual and multimodal resources and communicative practices, all of which combine in unique and different ways toward constructing meaning in the workplace. The volume's unique focus on such workplaces also showcases domains of work which have generally until now been less visible within existing research on language in the workplace and the subsequent methodological challenges that arise from studying them. Integrating a range of theoretical and methodological approaches, along with empirical data from a diverse range of blue-collar workplaces, this book will be of particular interest to students and researchers in critical sociolinguistics, applied linguistics, sociology, and linguistic anthropology.

**A History of the Study of the Indigenous Languages of North America** Jan 14 2022 The languages indigenous to North America are characterized by a remarkable genetic and typological diversity. Based on the premise that linguistic examples play a key role in the origin and transmission of ideas within linguistics and across disciplines, this book examines the history of approaches to these languages through the lens of some of their most prominent properties. These properties include consonant inventories and the near absence of labials in Iroquoian languages, gender in Algonquian languages, verbs for washing in the Iroquoian language Cherokee and terms for snow and related phenomena in Eskimo-Aleut languages. By tracing the interpretations of the four examples by European and American scholars, the author illustrates their role in both lay and professional contexts as a window onto unfamiliar languages and cultures, thus allowing a more holistic view of the history of language study in North America.

The Warriors Part 1 The Wetzels Nov 19 2019 The Warriors Part 1 The Wetzels is the backstory for a trilogy, telling how one of the most unusual and controversial true life characters in American Revolutionary War history was created. Knotche and his small band of native warriors capture two scrappy young boys, sons of a settler. Even though Knotche was seeking to avenge the murder of his father by taking white scalps, he spares their lives with plans for another member of his band to adopt them into their declining numbers.

Standing Under the Wrong Rainbow Jun 19 2022 Standing Under the Wrong Rainbow entwines insights from the Bible with the opinions of the author, G. Deon Thompson, to make the case for the durability of the traditional view of marriage as the lifelong union of one woman and one man, while exposing the shortcomings of modern arguments that speak in favor of gay marriage. Chapters treat a variety of topics, including the history of the notion of "rights," the scriptural grounding for the traditional morality of marriage, philosophies of truth, the challenges of modern life, the sacrificial nature of godly love, and the essence of marriage as God intends it for human life. If you have found yourself struggling with contemporary debates over the nature of marriage, if you wonder whether the church's traditional teachings still apply in the twenty-first century, and if you feel a growing divide between the practice of your faith and the life of the wider community, then Standing Under the Wrong Rainbow serves as a wake-up call and a guide to reclaiming the power of longstanding tradition.

*Impossible Persons* Jul 28 2020 A groundbreaking, comprehensive formal theory of grammatical person that recasts its empirical foundations and re-envision its theoretical core. *Impossible Persons*, Daniel Harbour's comprehensive and groundbreaking formal theory of grammatical person, upends understanding of a universal and ubiquitous grammatical category. Breaking with much past work, Harbour establishes three core theses, one empirical, one theoretical, and one metatheoretical. Together, these redefine the data subsumed under the rubric of "person," simplify the feature inventory that a theory of person must posit, and restructure the metatheory in which feature theory as a whole resides. At its heart, *Impossible Persons* poses a simple question of the possible versus the actual: in how many ways could languages configure their person systems, in how many do they configure them, and what explains the size and shape of the shortfall? Harbour's empirical thesis—that the primary object of study for persons are partitions, not syncretisms—transforms a sea of data into a categorical problem of the attested and the absent. Positing, innovatively, that features denote actions, not predicates, he shows that two features alone generate all and only the attested systems. This apparently poor inventory yields rich explanatory dividends, covering the morphological composition of person, its interaction with number, its connection to space, and properties of its semantics and linearization. Moreover, the core properties of this approach are shared with Harbour's earlier work on number features. Jointly, these results establish an important metatheoretical corollary concerning the balance between richness of feature semantics and restrictiveness of feature inventories. This corollary holds deep implications for how linguists should approach feature theory in future.

*Django Generations* Dec 01 2020 *Django Generations* shows how relationships between racial identities, jazz, and national belonging become entangled in France. Jazz manouche—a genre known best for its energetic, guitar-centric swing tunes—is among France's most celebrated musical practices of the twentieth and twenty-first centuries. It centers on the recorded work of famed guitarist Django Reinhardt and is named for the ethnoracial subgroup of Romanies (also known, often pejoratively, as "Gypsies") to which Reinhardt belonged. French Manouches are publicly lauded as bearers of this jazz tradition, and many take pleasure and pride in the practice while at the same time facing pervasive discrimination. Jazz manouche uncovers a contradiction at the heart of France's assimilationist republican ideals: the music is portrayed as quintessentially French even as Manouches themselves endure treatment as racial others. In this book, Siv B. Lie explores how this music is used to construct divergent ethnoracial and national identities in a context where discussions of race are otherwise

censured. Weaving together ethnographic and historical analysis, Lie shows that jazz manouche becomes a source of profound ambivalence as it generates ethnoracial difference and socioeconomic exclusion. As the first full-length ethnographic study of French jazz to be published in English, this book enriches anthropological, ethnomusicological, and historical scholarship on global jazz, race and ethnicity, and citizenship while showing how music can be an important but insufficient tool in struggles for racial and economic justice.

**Journey to the Edge of the Woods** Jul 20 2022 The prophet Jeremiah, mourning his people in the city of Zion, spoke of the balm that could heal them. He foresaw the physician and he asked, "Why then is not the health of the daughter of my people recovered?" The message of Jesus has been in North America for centuries, yet past history with the first nations of the land has left many native people thinking they have to choose either to be an Indian or to believe in Jesus. Jeremiah said, "The harvest is past, the summer is ended, and we are not saved." How, then, do we bring the balm of Gilead to the most oppressed group on the continent where women and children are suffering the highest rates of violence? When Jesus forgave a prostitute, when he offered living waters to the woman at the well who had six failed relationships, and when he healed a crippled woman, he showed us how he would build his church from the brokenhearted among all people. *Journey to the Edge of the Woods* visits women sharing concern over the degradation of our daughters, sisters, mothers, and friends in a world of intensifying confusion of the creation of male and female identities.

*Antipassive* Dec 13 2021 This book provides a comprehensive treatment of the morpho-syntactic and semantic aspects of the antipassive construction from synchronic, diachronic, and typological perspectives. The nineteen contributions assembled in this volume address a wide range of aspects pertinent to the antipassive construction, such as lexical semantics, the properties of the antipassive markers, as well as the issue of fuzzy boundaries between the antipassive construction and a range of other formally and functionally similar constructions in genealogically and areally diverse languages. Purely synchronically oriented case studies are supplemented by contributions that shed light on the diachronic development of the antipassive construction and the antipassive markers. The book should be of central interest to many scholars, in particular to those working in the field of language typology, semantics, syntax, and historical linguists, as well as to specialists of the language families discussed in the individual contributions.

*Competition Policy and Price Fixing* Mar 04 2021 Throughout the world, the rule against price fixing is competition law's most important and least controversial prohibition. Yet there is far less consensus than meets the eye on what constitutes price fixing, and prevalent understandings conflict with the teachings of oligopoly theory that supposedly underlie modern competition policy. *Competition Policy and Price Fixing* provides the needed analytical foundation. It offers a fresh, in-depth exploration of competition law's horizontal agreement requirement, presents a systematic analysis of how best to address the problem of coordinated oligopolistic price elevation, and compares the resulting direct approach to the orthodox prohibition. In doing so, Louis Kaplow elaborates the relevant benefits and costs of potential solutions, investigates how coordinated price elevation is best detected in light of the error costs associated with different types of proof, and examines appropriate sanctions. Existing literature devotes remarkably little attention to these key subjects and instead concerns itself with limiting penalties to certain sorts of interfirm communications. Challenging conventional wisdom, Kaplow shows how this circumscribed view is less well grounded in the statutes, principles, and precedents of competition law than is a more direct, functional proscription. More important, by comparison to the communications-based prohibition, he explains how the direct approach targets situations that involve both greater social harm and less risk of chilling desirable behavior--and is also easier to apply.

The textbook incorporates a robust set of pedagogical features including marginal definitions, a substantial glossary, chapter summaries, and

learning exercises. Brand new to this edition are suggested reading lists at the end of every chapter, and recommended websites and apps to further aid students in their study.

An Areal Typology of Agreement Systems Sep 10 2021 Surveying over 300 languages, this typological study presents new theoretical insights into the nature of agreement, as well as empirical findings about the distribution of agreement patterns in the world's languages. Focussing primarily on agreement in gender, number and person, but with reference to agreement in other smaller categories, Ranko Matasovi? aims to discover which patterns of agreement are widespread and common in languages, and which are rather limited in their distribution. He sheds new light on a range of important theoretical questions such as what agreement actually is, what areal, typological and genetic patterns exist across agreement systems, and what problems in the analysis of agreement remain unresolved.

The Ancient Maya Marketplace Jan 26 2023 Trading was the favorite occupation of the Maya, according to early Spanish observers such as Fray Diego de Landa (1566). Yet scholars of the Maya have long dismissed trade—specifically, market exchange—as unimportant. They argue that the Maya subsisted primarily on agriculture, with long-distance trade playing a minor role in a largely non-commercialized economy. The Ancient Maya Marketplace reviews the debate on Maya markets and offers compelling new evidence for the existence and identification of ancient marketplaces in the Maya Lowlands. Its authors rethink the prevailing views about Maya economic organization and offer new perspectives. They attribute the dearth of Maya market research to two factors: persistent assumptions that Maya society and its rainforest environment lacked complexity, and an absence of physical evidence for marketplaces—a problem that plagues market research around the world. Many Mayanists now agree that no site was self-sufficient, and that from the earliest times robust local and regional exchange existed alongside long-distance trade. Contributors to this volume suggest that marketplaces, the physical spaces signifying the presence of a market economy, did not exist for purely economic reasons but served to exchange information and create social ties as well. The Ancient Maya Marketplace offers concrete links between Maya archaeology, ethnohistory, and contemporary cultures. Its in-depth review of current research will help future investigators to recognize and document marketplaces as a long-standing Maya cultural practice. The volume also provides detailed comparative data for premodern societies elsewhere in the world.

**How Gender Shapes the World** May 26 2020 This is a book about the multi-faceted notion of gender. Gender differences form the basis for family life, patterns of socialization, distribution of tasks, and spheres of responsibilities. The way gender is articulated shapes the world of individuals, and of the societies they live in. Gender has three faces: Linguistic Gender-the original sense of 'gender'-is a feature of many languages and reflects the division of nouns into grammatical classes or genders (feminine, masculine, neuter, and so on); Natural Gender, or sex, refers to the division of animates into males and females; and Social Gender reflects the social implications and norms of being a man or a woman (or perhaps something else). Women and men may talk and behave differently, depending on conventions within the societies they live in, and their role in language maintenance can also vary. The book focuses on how gender in its many guises is reflected in human languages, how it features in myths and metaphors, and the role it plays in human cognition. Examples are drawn from all over the world, with a special focus on Aikhenvald's extensive fieldwork in Amazonia and New Guinea.
