Success in Answering Reference Questions Aug 28 2020 This volume reports two studies of reference accuracy in which participant data were gathered and examined.

Social Anxiety Disorder Sep 28 2020 Social anxiety disorder is persistent fear of (or anxiety about) one or more social situations that is out of proportion to the actual threat posed by the situation and can be severely detrimental to quality of life. Only a minority of people with social anxiety disorder receive help. Effective treatments do exist and this book aims to increase identification and assessment to encourage more people to access interventions. Covers adults, children and young people and compares the effects of pharmacological and psychological interventions. Commissioned by the National Institute for Health and Clinical Excellence (NICE). The CD-ROM contains all of the evidence on which the recommendations are based, presented as profile tables (that analyse

quality of data) and forest plots (plus, info on using/interpreting forest plots). This material is not available in print anywhere else.

Wrestling the Angel Jul 07 2021 "Wrestling the Angel, Vol. I is the first in a two part study of the foundations of Mormon thought and practice, situated in the context of an overview of the Christian tradition. The book traces the essential contours of Mormon thought as it developed from Joseph Smith to the present. Terryl L. Givens, one of the nation's foremost Mormon scholars, offers a sweeping account of the history of Mormon belief, revealing that Mormonism is a tradition still very much in the process of formation."--Provided by the publisher.

Extraordinarily Ordinary Feb 02 2021

Extraordinarily Ordinary offers a critical analysis of the production of a distinct form of twenty-first century celebrity constructed through the exploding coverage of reality television cast members in Us Weekly magazine. Erin A. Meyers connects the economic and industrial forces that helped propel Us Weekly to the top of the celebrity gossip market in the early 2000s with the ways in which reality television cast members fit neatly into the social and cultural

norms that shaped the successful gossip formulas of the magazine. Us Weekly's construction of the "extraordinarily ordinary" celebrity within its gossip narratives is a significant symptom of the broader intensification of discourses of ordinariness and the private in the production of contemporary celebrity, in which fame is paradoxically grounded in "just being yourself" while simultaneously defining what the "right" sort of self is in contemporary culture.

Academic Assessment and Intervention May 05 2021 Serving students with academic deficiencies necessitates communication and collaboration among professionals from several disciplines. Academic Assessment and Intervention brings together divergent approaches in order to demonstrate that scientific evidence, rather than biases or previous practice, must determine assessment practices that are selected and used for particular purposes. Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention; describes both norm-referenced and curriculum-based assessment/measurement in detail; considers the

implications of both of these assessments on ethnically diverse populations; provides a clear link between assessment, evidence-based interventions and the RTI model; and considers other important topics related to this area such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology, or child clinical psychology, it will also be of interest to practicing professionals in these fields.

Being a Good Citizen Dec 20 2019
The Publishers Weekly Mar 23 2020
The Civil Rights Movement in Mississippi Feb 26 2023 Based on new research and combining multiple scholarly approaches, these twelve essays tell new stories about the civil rights movement in the state most resistant to change. Wesley Hogan, Françoise N. Hamlin, and Michael Vinson Williams raise questions about how civil rights organizing took place. Three pairs of essays address African Americans' and whites' stories on education, religion, and the issues of violence. Jelani Favors and Robert Luckett analyze civil rights issues on the campuses of Jackson State University and the University of Mississippi. Carter Dalton Lyon and Joseph T. Reiff study people who confronted the question of how their religion related to their possible involvement in civil rights activism. By studying the Ku Klux Klan and the Deacons for Defense in Mississippi, David Cunningham and Akinyele Umoja ask who chose to use violence or to raise its possibility. The final three chapters describe some of the consequences and continuing questions raised by the civil rights movement. Byron D'Andra Orey analyzes the degree to which voting rights translated into

political power for African American legislators. Chris Myers Asch studies a Freedom School that started in recent years in the Mississippi Delta. Emilye Crosby details the conflicting memories of Claiborne County residents and the parts of the civil rights movement they recall or ignore. As a group, the essays introduce numerous new characters and conundrums into civil rights scholarship, advance efforts to study African Americans and whites as interactive agents in the complex stories, and encourage historians to pull civil rights scholarship closer toward the present.

Strategic Education Research Partnership Apr 04 2021 Envision a cadre of leading scientists and practitioners working collaboratively on a highly focused program of education research that is tightly coupled with practice. Much of the research is carried out in school settings. Research influences educational practice, and the outcomes in practice inform further research efforts. The Strategic Education Research Partnership (SERP) is designed to make this vision a reality. It proposes a large-scale, coherent program of research and development that would put the problems of educational practice at its center, and focus on all stages

necessary to influence practice. These include theory testing, the development and evaluation of instructional programs, the study of practice in context, and attention to taking innovations to scale. This book explains the features of SERP and the ways in which it would address the major challenges of linking research and practice. It is a call to mobilize the nation's resources and political will, the power of scientific research, and the expertise of our educators, to create a more effective research and development program for improving student learning.

A Frontier Lady Oct 22 2022 Since it was first published in 1932, A Frontier Lady has held a high and special place in the literature of Americas westward migration. Written in the 1880s at the request of her son, the philosopher and educator Josiah Royce, Sarah Royce's narrative of the family odyssey across the continent and of their early years in California is also the portrait of a remarkable woman. In the words of her daughter-in-law, "Wherever she was, she made civilization, even when it seemed that she had little indeed from which to make it."

Upstanders Jul 19 2022 "How can we meet today's elevated goals and engage middle school kids-but not simply replicate our winner-take-all society? How can our students achieve a higher standard-the commitment to bend the world towards justice? In a word, inquiry. Welcome to the classroom of Sara Ahmed. With Smokey Daniels as your guide you'll see exactly how Sara turns required topics into questions young adolescents can't resist investigating and units that help them become thoughtful,

compassionate, and action-oriented. Smokey and Sara share everything you need: a developmental look at middle school kids, lessons for collaboration, self-awareness, and compassion, a toolbox of strategies, structures, and handouts, commentary from Smokey that highlights key teaching moves, Game-Time Decisions from Sara that reveal instructional choices, documentation of the incredible work that inquiry allows kids to do, engaging units on commonly taught middle school themes. Give kids all the complexity the standards could ever expect, and something they don't: the chance to grow from bystanders into Upstanders." -- pages (4) of cover.

Families Caring for an Aging America Nov 30 2020 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an

Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Dietary Reference Intakes for Vitamin C, Vitamin E, Selenium, and Carotenoids Aug 08 2021 This volume is the newest release in the authoritative series of quantitative estimates of nutrient intakes to be used for planning and assessing diets for healthy people. Dietary Reference Intakes (DRIs) is the newest framework for an expanded approach developed by U.S. and Canadian scientists. This book discusses in detail the role of vitamin C, vitamin E, selenium, and the carotenoids in human physiology and health. For each nutrient the committee presents what is known about how it functions in the human body, which factors may affect how it works, and how the nutrient may be related to chronic disease. Dietary Reference Intakes provides reference intakes, such as Recommended Dietary Allowances (RDAs), for

use in planning nutritionally adequate diets for different groups based on age and gender, along with a new reference intake, the Tolerable Upper Intake Level (UL), designed to assist an individual in knowing how much is "too much" of a nutrient.

Appalachian Reckoning Sep 09 2021 In Hillbilly elegy, J.D. Vance described how his family moved from poverty to an upwardly mobile clan while navigating the collective demons of the past. The book has come to define Appalachia for much of the nation. This collection of essays is a retort, at turns rigorous, critical, angry, and hopeful, to the long shadow cast over the region and its imagining. But it also moves beyond Vance's book to allow Appalachians to tell their own diverse and complex stories of a place that is at once culturally rich and economically distressed, unique and typically American. -- adapted from back cover

Nathan Hale Jan 01 2021 "It was September 1776 and the American colonies had just declared independence from the British. But General George Washington knew things were not going the Americans' way. When Gen. Washington needed someone to spy on the British, only one young man volunteered. That

man was Nathan Hale, an early American hero."--

The China Study May 17 2022 Referred to as the "Grand Prix of epidemiology" by The New York Times, this study examines more than 350 variables of health and nutrition with surveys from 6,500 adults in more than 2,500 counties across China and Taiwan, and conclusively demonstrates the link between nutrition and heart disease, diabetes, and cancer. While revealing that proper nutrition can have a dramatic effect on reducing and reversing these ailments as well as curbing obesity, this text calls into question the practices of many of the current dietary programs, such as the Atkins diet, that are widely popular in the West. The politics of nutrition and the impact of special interest groups in the creation and dissemination of public information are also discussed.

Teaching Critically About Lewis and Clark Jan 21 2020
The Lewis and Clark Corps of Discovery is often presented as an exciting adventure story of discovery, friendship, and patriotism. However, this same period in U.S. history can be understood quite differently when viewed through anticolonial lens and the Doctrine of Discovery. How might educators critically interrogate the assumptions that underlie this adventure story through their teaching? This book challenges dominant narratives and packaged curriculum about Lewis and Clark to support more responsible social studies instruction. The authors provide a conceptual

framework, ready-to-use lesson plans, and teaching resources to address oversimplified versions of the Lewis and Clark expedition. Indigenous perspectives, along with contemporary issues, are embedded in each lesson to encourage active and critical engagement with history and the legacies of conquest those living in what is now called the United States have inherited. Book Features: Offers a new look at social studies curriculum about the Corps of Discovery—and Manifest Destiny—through the Doctrine of Discovery. Includes examples of how Indigenous peoples have long engaged in philosophical, legal, and political challenges to the principles of the Doctrine. Provides social studies lesson plans for elementary and secondary classrooms. Offers useful curriculum materials to help teachers present a deeper examination of this topic.
