(1) The current edition of the book 7500+ objective questions, objective Jharkhand is written by Dr. Manish Rannjan (IAS), provides all the information about Jharkhand in MCQs format. The book is very much useful for all Competitive examinations of Jharkhand. (2) The book is divided into three parts. (3)Part-I compiles objective questions related to the state of Jharkhand, under which the history, literature, educational institutions, sports, land laws, economic development, industrial development, plans, policies, forests, wildlife, art & culture, environment, disaster Management, personalities of Jharkhand, economy, census and budget (2021-22) etc. included. (4) Part II provides 115 Practice Sets in which candidates can continuously evaluate their knowledge by practicing before exams. (5) Part-III of the book provides Jharkhand based questions from previous years solved

papers which asked in various competitive examinations conducted since formation of the Jharkhand state. (6) The book has a compilation of more than 7500 objective questions which makes it special. (7)The book is extremely useful for the candidates preparing for various competitive exams and wishing to fly the new carrier with high dreams. The book encompasses the state-of-the-art visual quality assessment (VQA) and learning based visual quality assessment (LB-VQA) by providing a comprehensive overview of the existing relevant methods. It delivers the readers the basic knowledge, systematic overview and new development of VQA. It also encompasses the preliminary knowledge of Machine Learning (ML) to VQA tasks and newly developed ML techniques for the purpose. Hence, firstly, it is particularly helpful to the beginner-readers (including research students) to enter into VQA field in general and LB-VQA one in particular. Secondly, new development in VQA and LB-VQA particularly are detailed in this book, which will give peer researchers and engineers new insights in VQA. The concept of a '21st-Century Maritime Silk Road' refers to the proposed modern-time version of the ancient Maritime Silk Road that connected China with the rest of Asia, and even parts of eastern Africa. It is a strategic initiative designed to increase investments in and foster collaboration among all countries along the ancient Silk Road. This volume, 21st-Century Maritime Silk Road Initiative: Aims and Objectives, Implementation Strategies and Policy Recommendations, presents the latest research findings on the directions and implementation methods related to the initiative, and contributors offer policy suggestions, include promoting effective macroeconomic policies, extending microeconomic cooperation schemes, removing trade barriers and facilitating financial integration, building infrastructures that can connect all subregions in Asia, and increasing people-to-people exchanges and industrial cooperation. The three-volume set CCIS 923, CCIS 924, and CCIS 925 constitutes the thoroughly refereed proceedings of the First International Conference on Intelligent Manufacturing and Internet of Things, and of the 5th International Conference on Intelligent Computing for Sustainable Energy and Environment, ICSEE 2018, held in Chongqing, China, in September 2018. The 135 revised full papers presented were carefully reviewed and selected from over 385 submissions. The papers of this volume are organized in topical sections on: digital manufacturing; industrial product design; logistics, production and operation management; manufacturing material; manufacturing optimization; manufacturing process; mechanical transmission system; robotics. 54 NTA UGC NET Paper 1 Topic-wise Solved Papers (2021 to 2004) consists of authentic Past Years Solved Papers from 2021 Phase II to 2004 Phase II. # The USP of the book is its division into 10 Units which have been further divided into 49 Topics as per the latest UGC syllabus. # 2 sets of Dec 2021, 2 sets of Sep 2020, 10 Sets each of

June 2019 Ph I & Dec 2019 Ph II, 1set each from 2004 - 2018 Papers have been included in this edition. # The book also provides Trend Analysis of Past Year Papers. # The solutions have been prepared after a thorough research. # The book contains 2950+ Questions in all. The detailed solutions are provided immediately after each chapter. # The book is also useful for SET (JRF & Asst. Professor). Nutrition in Public Health, Third Edition defines the state of public health nutrition and the services offered in the United States today. It provides readers with a description of public health in the U.S. through data and expertise from relevant contributing authors, and discusses the active services and service agencies that are available to manage today's health issues. New to the Third Edition: Nutritional epidemiology chapter; Environmental and economic concerns of today; Food security in global terms; World hunger and the implications to public health nutrition; and public health nutrition and fitness programs and services in America 2022-23 SSC CGL/CHSL/CPO SI/JE/MTS/GD General Studies Chapter-wise Solved Papers Real-world engineering problems often require concurrent optimization of several design objectives, which are conflicting in cases. This type of optimization is generally called multi-objective or multi-criterion optimization. The area of research that applies evolutionary methodologies to multi-objective optimization is of special and growing interest. It brings a viable computational solution to many real-world problems. Generally, multi-objective engineering problems do not have a straightforward optimal design. These kinds of problems usually inspire several solutions of equal efficiency, which achieve different trade-offs. Decision makers' preferences are normally used to select the most adequate design. Such preferences may be dictated before or after the optimization takes place. They may also be introduced interactively at different levels of the optimization process. Multi-objective optimization methods can be subdivided into classical and evolutionary. The classical methods usually aim at a single solution while the evolutionary methods provide a whole set of so-called Pareto-optimal solutions. Evolutionary Multi-Objective System Design: Theory and Applications provides a representation of the state-of-the-art in evolutionary multi-objective optimization research area and related new trends. It reports many innovative designs yielded by the application of such optimization methods. It also presents the application of multi-objective optimization to the following problems: Embrittlement of stainless steel coated electrodes Learning fuzzy rules from imbalanced datasets Combining multi-objective evolutionary algorithms with collective intelligence Fuzzy gain scheduling control Smart placement of roadside units in vehicular networks Combining multi-objective evolutionary algorithms with quasi-simplex local search Design of robust substitution boxes Protein structure prediction problem Core assignment for efficient network-on-chip-based system

design This Selected Issues paper examines infrastructure investment in Brazil. Brazil has inferior overall infrastructure quality relative to almost all its export competitors. Brazil's infrastructure endowment ranks low by international standards, and its low quality affects productivity, market efficiency, and competitiveness. Areas in which Brazil's competitiveness has lagged include, but are not limited to, education, innovation, governance, and justice. Brazil's infrastructure gap has become a major obstacle to growth and filling this gap will entail increasing investment and also stepping up other reforms. In *Rockin' the Free World*, international relations expert Sean Kay takes readers inside "Bob Dylan's America" and shows how this vision linked the rock and roll revolution to American values of freedom, equality, human rights, and peace while tracing how those values have spread globally. *Rockin' the Free World* then shows how artists have engaged in advancing change via opportunity and education; domestic and international issue advocacy; and within the recording and broader communications industry. The book is built around primary interviews with prominent American and international performing artists ranging from Rock and Roll Hall of Fame inductees and Grammy winners to regional and local musicians. The interviews include leading industry people, management, journalists, heads of non-profits, and activists. The book concludes with a look at how musical artists have defined the American experience and what that has meant for the world. Get the best out of your employees! This book is a practical and accessible guide to understanding and implementing Management by Objectives, providing you with the essential information and saving time. In 50 minutes you will be able to:

- Work with employees to set clear objectives
- Motivate your employees to reach their objectives
- Boost performance and employee satisfaction in your company

ABOUT 50MINUTES.COM| Management & Marketing 50MINUTES.COM provides the tools to quickly understand the main theories and concepts that shape the economic world of today. Our publications are easy to use and they will save you time. They provide both elements of theory and case studies, making them excellent guides to understand key concepts in just a few minutes. In fact, they are the starting point to take action and push your business to the next level. It is now almost impossible to conceive of life in western Europe, either in the towns or the countryside, without a reliable mains electricity supply. By 1938, two-thirds of rural dwellings had been connected to a centrally generated supply, but the majority of farms in Britain were not linked to the mains until sometime between 1950 and 1970. Given the significance of electricity for modern life, the difficulties of supplying it to isolated communities, and the parallels with current discussions over the provision of high-speed broadband connections, it is surprising that until now there has been little academic discussion of this vast and protracted undertaking. This book fills that gap. It is divided into three parts. The first, on the progress of electrification, explores the timing and extent of electrification in rural England, Wales and Scotland; the second examines the effects of electrification on rural life and the rural landscape; and the third makes comparisons over space and time, looking at electrification in Canada and Sweden

and comparing electrification with the current problems of rural broadband. This text is a timely and comprehensive examination of consumer participation in EU competition law enforcement. Using in-depth analysis of recent case law and policy documents, it offers a clear and innovative framework of the subject's normative and practical aspects, and proposes necessary remedial and procedural rules to enable participation. This book demonstrates how human rights obligations of the EU foreign constitution can be operationalized in the realm of international economic regulation. The content is divided into three major parts. The first outlines the legal foundations needed for the EU to become a shaper of international investment law, which include the general principles and objectives of EU external policies, the Charter of Fundamental Rights, international human rights and the international investment competences of the EU. The second part demonstrates the current international investment regime's incompatibility with human rights interests, while the third analyzes two mechanisms stemming from trade Law - ex-ante human rights impact assessments and civil society monitoring bodies - and explores whether they could mitigate the current inequalities in the protection of rights. The potential of these mechanisms, the book argues, lies in their capacity to ensure a comprehensive assessment of all interests at stake, and to empower traditionally marginalized rights-holders to make, shape and contest the international investment regime. The Simla Convention of 1914, held between Great Britain, China, and Tibet, demarcated the border between India and Tibet and gave birth to the McMahon Line. This volume critically examines the legacy of the 1914 Conference and explores its relevance in scholarly discourse about the status of Tibet and Sino-Indian relations more than a hundred years later. The book discusses the significance of the Simla Conference both in terms of the geo-politics of boundaries as well as the people and the liminal borderlands they occupy, encapsulating the culture and diversity of the trans-Himalayan regions. It explicates how colonial legacies, viz., the 1914 Simla Convention, have become virtual straitjackets, hardening the positions on the boundaries between India and China. It also looks at the debilitating consequences of the nation-state framework on more substantial investigations of the borderlands. Rich in archival material and drawing from the authors' fieldwork in the Himalayan regions, this book analyses muted voices of the inhabitants of the region to bring into focus the larger question of the political, economic, religious, ecological and social life of the Himalayan peoples, which has enormous implications for both India and China. This volume will be of interest to students of history, international relations, sociology, strategic studies, Asian studies and anthropology. The global economy got off to a bumpy start this year, but growth in 2015 and 2016 looks to be broadly on track. Projections for developing countries in 2014 have been downgraded by 0.5 percentage points to 4.8 percent mainly reflecting weak first quarter growth in the US due to weather and the conflict in Ukraine. Going forward growth is projected to firm to 5.3 and 5.5 percent in 2015 and 2016 supported by easy global financial conditions and rebounding exports as high-income countries

continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets. Financial conditions will eventually tighten, and when they do there is risk of further volatility. Most developing countries are in good fiscal and financial shape, but where vulnerabilities remain countries need to tighten policy to reduce the potential impact of external shocks. Overall, growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2013. As a result, countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner. This report is the third OECD review of Poland's environmental performance. It evaluates progress towards sustainable development and green growth, with a focus on forestry and biodiversity, as well as waste and materials management. This book offers the first exploration into the development of social enterprises in the Greater China region, consisting of Hong Kong, Macau, Taiwan and Mainland China. By drawing on the research and experience of over a dozen scholars and practitioners from across the area, it offers a picture of how a strong State can play an important role as a catalyst in developing the social entrepreneurship sector, particularly by legitimizing it. It delves into the role and impact of institutions and policy on the development of social enterprises, and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts - policy and cases - it reveals the historical development of the Social enterprises sector in the Chinese context and then illustrates this using cases studies. Providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector, the book questions whether or not social entrepreneurship is preferable to more conventional models of development. Sparking new interest and offering fresh insight into social entrepreneurship in the Greater China region, this book will be useful to students and scholars of Chinese Studies, Business Studies and Sociology. This volume of *Advances in Intelligent Systems and Computing* contains accepted papers presented in the main track of ECC 2015, the Second Euro-China Conference on Intelligent Data Analysis and Applications. The aim of ECC is to provide an internationally respected forum for scientific research in the broad area of intelligent data analysis, computational intelligence, signal processing, and all associated applications of AIs. The second edition of ECC was organized jointly by VSB - Technical University of Ostrava, Czech Republic, and Fujian University of Technology, Fuzhou, China. The conference, organized under the patronage of Mr. Miroslav Novak, President of the Moravian-Silesian Region, took place in late June and early July 2015 in the Campus of the VSB - Technical University of Ostrava, Czech Republic. Transition from Objective-C to the cleaner, more functional Swift quickly and easily Professional Swift shows you how to create Mac and iPhone applications using Apple's new programming language. This code-intensive, practical guide walks you through Swift best practices as you learn the language, build an application, and refine it using advanced concepts and techniques. Organized for easy navigation, this book can be read end-to-end for a self-

paced tutorial, or used as an on-demand desk reference as unfamiliar situations arise. The first section of the book guides you through the basics of Swift programming, with clear instruction on everything from writing code to storing data, and Section II adds advanced data types, advanced debugging, extending classes, and more. You'll learn everything you need to know to make the transition from Objective-C to Swift smooth and painless, so you can begin building faster, more secure apps than ever before. Get acquainted with the Swift language and syntax Write, deploy, and debug Swift programs Store data and interface with web services Master advanced usage, and bridge Swift and Objective-C Professional Swift is your guide to the future of OS X and iOS development. The main feature of an outstanding lesson is that all students make progress. Taking the structure of a lesson as the starting point, this book demonstrates how assessment for learning can be used to enhance and support all aspects of the learning process. Including chapters on embedding assessment during each phase of the lesson, using assessment data to inform planning, questioning techniques and feedback, the book will help you to use assessment effectively to produce outstanding results. Packed full of practical strategies, this book shows you how you can make assessment meaningful in the classroom, directly impacting your students and creating a more autonomous learning environment. It is written specifically with the class teacher in mind and draws on a range of different examples across many subjects to deliver ideas that can be translated with ease to everyday teaching practices. With a strong focus on including assessment practices in the planning process to achieve outstanding results, this book covers: assessment for learning and an overview of the learning cycle practical teaching strategies and effective techniques to use in the classroom marking, feedback and using data to drive learning embedding assessment for learning in your classroom, department and school An effective guide for outstanding teaching and learning, this book offers an innovative approach and is packed full of practical exercises that are easy to apply in the classroom, proving essential reading for newly qualified and experienced teachers alike. This book examines law and religion from the perspective of its case law. Each chapter focuses on a specific case from a Commonwealth jurisdiction, examining the history and impact of the case, both within the originating jurisdiction and its wider global context. The book contains chapters from leading and emerging scholars from across the Commonwealth, including from the United Kingdom, Canada, Australia, Pakistan, Malaysia, India and Nigeria. The cases are divided into four sections covering: - Foundational Questions in Law and Religion - Freedom of Religion around the Commonwealth - Religion and state relations around the Commonwealth - Rights, Relationships and Religion around the Commonwealth. Like religion itself, the case law covers a wide spectrum of life. This diversity is reflected in the cases covered in this book, which include: - Titular Roman Catholic Archbishop of Kuala Lumpur v Home Minister on the use of the Muslim name for God by non-Muslims in Malaysia - The Church of the New Faith v

Commissioner of Pay-roll Tax (Vic) which determined the meaning of religion in Australia - Eweida v UK which clarified the application of Article 9 of the European Convention on Human Rights - R v Big M Drug Mart on the individual protections of religious freedom under the Canadian Charter of Rights. The book examines how legal disputes involving religion are among the most contested in the courts and shows that in these cases, passions run high and the outcomes can have significant consequences for all involved. The thoroughly revised & updated 3rd edition of 'CDS 12 Years Mathematics, English & General Knowledge Topic-wise Solved Papers (2007 Feb - 2018 Feb)' consists of last 12 years (both Feb and November papers) from 2007 Paper 1 - 2018 Paper 1 solved papers of Elementary Mathematics, English and General Knowledge distributed into 42 topics. In all there are 23 Question papers from 2007 to 2018 - I which have been divided into the above discussed 42 topics. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. All the papers are divided into following sections: Section I - Mathematics which is distributed into 25 topics Section II - English is divided into 8 topics Section III - General Knowledge is divided into 9 topics The book contains 6460+ MILESTONE MCQ's from the above 23 Question papers. The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students. CDS & CDS OTA 16 Years General Knowledge Topic wise Solved Papers (2007 - 2022) 3rd Edition CDS & CDS OTA 16 Years General Knowledge Topic-wise Solved Papers (2007 Feb - 2022 April)' consists of last 16 years from 2007 Paper 1 - 2022 Paper 1 solved papers of General Knowledge distributed into 9 topics. # In all there are 31 Question papers from 2007 to 2022 - I which have been divided into the above discussed 9 topics. Practicing these questions, aspirants will come to know about the pattern and toughness of the questions asked in the examination. # The book contains 3640+ MILESTONE MCQ's from the above 31 Question papers. # The strength of the book lies in the originality of its question papers and Errorless Solutions. # The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students. In educational institutions, outcome-based education (OBE) remains crucial in measuring how certain teaching techniques are impacting the students' ability to learn. Currently, these changes in students are mapped by analyzing the objectives and outcomes of certain learning processes. International accreditation agencies and quality assessment networks are all focusing on mapping between outcomes and objectives. The need of assessment tools arises that can provide a genuine mapping in the global context so that students or learners can achieve expected objectives. Assessment Tools for Mapping Learning Outcomes With Learning Objectives is a pivotal reference source that provides vital research on the implementation of quality assessment methods for measuring the outcomes of select learning processes on students. While highlighting topics such as quality assessment, effective employability, and student learning objectives, this book is

ideally designed for students, administrators, policymakers, researchers, academicians, practitioners, managers, executives, strategists, and educators seeking current research on the application of modern mapping tools for assessing student learning outcomes in higher education. The BBC holds a special place in the world of broadcasting. It derives its funding from a compulsory levy on people who may not even use the service. The protection it receives is justified on the grounds that it contributes to national welfare because of its role in 'public service broadcasting'. The authors of this book argue that the BBC's funding model is becoming untenable as technology changes. Furthermore, technology has also undermined the justification for government support for public service broadcasting. There is also major concern about bias at the BBC. However, the book concludes that bias is not confined to the BBC, but is common to all media providers. The problem is not bias as such, but the link between the BBC and the government, together with the compulsory funding model which does not allow people to not fund content of which they disapprove. Various options for reform are presented, concluding with a proposal for full-blown privatisation. It is concluded that this is the only way to realise the potential of an organisation that should be international in scope and which, under the current funding model, will become marginalised by media players operating worldwide across a range of platforms. This book is essential reading for anybody involved in public policy or the economics of broadcasting. This book addresses three big economic challenges from a dynamic perspective: European integration, economic growth, and global climate change. In the light of the recent crises of the European Union (EU), the first part of the book deals with challenges to the real, monetary and fiscal integration of the EU and required institutional adjustments. The second part of the book addresses fundamental challenges of advanced market economies like economic growth and changes of technologies. The final part focuses on the global challenge of climate change from an economic perspective and discusses policy strategies for a successful mitigation of climate change. This Paper discusses Pakistan's Third Review Under the Extended Arrangement and Request for Waiver of Nonobservance of Performance Criterion (PC). The economy is showing signs of improvement. The FY2013/14 growth projection has been revised upward from 3.1 percent to 3.3 percent, as economic indicators continue to show better-than-expected performance. For FY2014/15, the economy is forecast to expand by about 4 percent. All quantitative PCs were met with the exception of the ceiling on Net Domestic Assets of the State Bank of Pakistan, which was missed by a small margin. On the basis of Pakistan's performance under the extended arrangement, the IMF staff supports the authorities' request for completion of the third review under the arrangement. 2022-23 TGT/PGT/LT Grade Commerce Chapter-wise Solved Papers What current discourses are relevant for border areas? What opportunities for and obstacles to integrated territorial development arise from the specific situation of border regions? How can these be utilised or overcome in a goal-oriented way? These questions were central to the discussions of the Border Futures

working group. Border regions like the Greater Region or the Trinational Metropolitan Region of the Upper Rhine extend far beyond the immediate border area. While institutional structures of cooperation can be perpetuated through agreements and organisations, there is a lack of instruments which cross-border cooperation structures can deploy in response to changing situations. Cross-border cooperation faces new challenges from increasing cross-border interactions, processes of economic structural transformation, new energy policies in the national sub-spaces, and demographic change. Another factor is increasing spatial polarisation, which influences the further development and future viability of the affected border areas, and involves metropolisation issues in urban centres and the provision of public services in rural districts. Building on discussions of the Border Futures working group, this volume sheds light on cross-border cooperation in practice with recent research relevant to planning in border regions in the European context. The insights collected here are intended to be usable in the border areas within the territory of the Regional Working Group and should also contribute towards the broader specialist discourse on the further development of cross-border cooperation. Issues of sustainable cross-border governance, new spatial functions and new planning instruments play a role here, as do the possibilities provided by the current EU structural policy programming period for border areas. A significant proportion of serious crime is economically motivated. Almost all financial crimes will be either motivated by greed, or the

desire to cover up misconduct. This Handbook addresses financial crimes such as fraud, corruption and money laundering, and highlights both the risks presented by these crimes, as well as their impact on the economy. The contributors cover the practical issues on the topic on a transnational level, both in terms of the crimes and the steps taken to control them. They place an emphasis on the prevention, disruption and control of financial crime. They discuss, in eight parts, the nature and characteristics of economic and financial crime, The enterprise of crime, business crime, the financial sector at risk, fraud, corruption, The proceeds of financial and economic crime, and enforcement and control. Academics interested in criminology, law, as well as business and legal studies students will find this book to be an invaluable resource. Practitioners, including lawyers, compliance and risk managements, law enforcement officers, and policy makers will also find the points raised to be of use. This proceedings volume contains selected papers presented at the 2014 International Conference on Information Engineering and Education Science (ICIEES 2014), held June 12-13 in Hong Kong, China. The objective of ICIEES 2014 was to provide a platform for researchers, engineers, academics as well as industry professionals from all over the world to Context and policy challenges. Mozambique's macroeconomic performance remains robust, with strong growth and low inflation. In spite of the heightened risks from an uncertain global outlook, growth is expected to be broad-based in the medium term and boosted by the natural resource boom and infrastructure investment. Short-term

policy framework. The main short-term challenge is to maintain the growth momentum while preserving fiscal and debt sustainability. The 2014 fiscal stance is expansionary, and fiscal consolidation needs to be initiated in the 2015 budget to restore prudent fiscal management. While low international prices have dampened inflation, the Bank of Mozambique should stay vigilant and adhere to its medium-term inflation target. Key structural reform priorities include improving VAT and overall tax administration, continuing public financial management reforms, strengthening capacity for transparent public investment management and borrowing, and enhancing the business environment and financial sector development. Completion of the LNG contract negotiations is a critical milestone for the launch of this project, one of the largest in sub-Saharan Africa. Medium-term reforms. Fiscal adjustment over the medium term will be essential to preserve debt sustainability and macroeconomic stability. This requires measures to contain current spending pressures while bringing investment to a more sustainable level. Structural reforms focusing on public financial management, monetary policy tools and banking supervision, and business facilitation should be implemented vigorously to sustain growth and render it more inclusive. With foreign aid likely to decline over the medium term, increased borrowing can provide additional resources for improving both Mozambique's physical infrastructure and human capital. To ensure the efficiency of investment and borrowing, further strengthening of investment planning and implementation, and debt management are essential.
